Withering Wetlands-Global Trends in Wetland Loss and Degradation-Why, and What Can Be Done About it.[Ecosystem economics - can we put a price on nature?](#) *Economic Valuation Of Wetland Ecosystem*

Globally, several studies on economic valuation of wetlands have been carried out; however very few studies which focus on the total economic contribution of wetlands have been carried out in which the annual value of goods and services from wetland was estimated to be second highest, US\$14785/ha based on the assessment of 17 ecosystems services in 16 biomes, which emphasise on social welfares .

A Total Economic Valuation of Wetland Ecosystem Services ...

One global study estimated that the economic value of wetlands is \$3.4 billion yr-1 based on the variety of services these ecosystems provide for human well-being (Schuyt and Brander 2004). Much of this value is over-looked when it comes to decision-making about land use in wetlands because these values do not appear in national financial accounts.

Guide for Rapid Economic Valuation of Wetland Ecosystem ...

Emerton and Kekulandala used market price to value the economic benefits associated with fishing, agriculture and handicraft production activities in Muthurajawela wetland. The market value of firewood obtained from Muthurajawela was INR 7.96 million/year

Economic Valuation of Wetland Ecosystem Goods and Services ...

The economic valuation of wetlands helps to understand the constituent's functions and benefits and this exercise could act as a catalyst for wetland conservation.

(PDF) Economic valuation of wetlands - ResearchGate

Over four-fifths of the economic value of the wetland services assessed in this study were estimated to come from the directly used provisioning services, and these contributed more than 70% of annual household income of the local population. Thus ecosystems services should be seen as an integral part of any poverty reduction strategy in Nepal.

the economic valuation of wetland benefits and functions through dissemination of valuation methods. This book sets out to provide guidance to policy makers and planners on what the potential is for economic valuation of wetlands and how valuation studies can be undertaken. Since it is not expected that policy makers will undertake

ECONOMIC VALUATION OF WETLANDS - Ramsar

The wetland ecosystem services in the 35 national nature reserves had a total value of 331.6 8 USDy – 1 × 10 8 (Table 4). Habitat was the most valuable ecosystem service (100.77 USDy – 1 ...

(PDF) Valuation of Wetland Ecosystem Services in National ...

The total economic value of 63 million hectares of wetland around the world was estimated at \$3.4 billion per year. Wetlands in Asia have the highest economic value at \$1.8 billion per year. This figure may even be higher if we take the estimate cited by Ramsar of global wetland area to be 12.8 million km square.

Benefits transfer: The economic value of world's wetlands

Final Report – June 7, 2011. economic value of ecosystem services associated with healthy wetland habitats in Delaware, such as fishing, hunting, and wildlife viewing. INTERPRETING THE RESULTS. We estimate an annualized loss of approximately \$2.4 million in the value of the ecosystem services analyzed.

ECONOMIC VALUATION OF WETLAND ECOSYSTEM SERVICES IN DELAWARE

Ecosystem service valuation is a technique which can aid in the development of public and political support for wetland restoration projects by deriving monetary values as well as relative value indicators (see discussion on pg. 20 in “Non-monetary Values”) for many non-marketed benefits produced by wetlands.

ECOSYSTEM SERVICE VALUATION FOR WETLAND RESTORATION

Economic valuation of wetland ecosystem services and biodiversity is an expression of these weights in monetary terms, making them comparable with alternate uses which often have benefits and cost flows defined in similar units. It is an anthropocentric way of looking at wetlands, ...

Economic Valuation of Wetlands: Overview | SpringerLink

Economic Benefits of Wetlands Wetlands contribute to the national and local economies by producing resources, enabling recreational activities and providing other benefits, such as pollution control and flood protection.

Economic Benefits of Wetlands - US EPA

It has been established that sustainable management of wetland ecosystem and associated resources depends on among other factors, the understanding of their economic value. Furthermore, in order to have a sustained economic growth, there is a need to capture fluctuations in the resources base values and include them in national accounts.

Economic valuation and green accounting of wetland ...

Wetlands comprise areas intersecting relatively shallow water and land. The wetlands ecosystem relies upon the interaction of dominant wildlife in wetlands with abiotic factors. Wetlands serve as environmental cleansers, storm barriers and a source of food for many species in the world.
